

Day-4 Building Dynamic Frontend Components For Your MarketPlace

Building dynamic frontend components: Developing responsive components using Next.js for product listings.

Implementing sorting and filtering: Creating filters for price, categories, and product types.

Product state management: Managing product data through state management tools.

Optimizing for mobile: Ensuring the marketplace is mobile-responsive.

Backend integration: Connecting frontend components to backend data for seamless user experience.

59  <main className="px-4 py-6">
```

The screenshot shows a user interface for a shopping website. At the top, there's a navigation bar with "Home > Shop". Below it is a search bar containing "Sofa" and a dropdown menu set to "Price: High to Low". On the left, there are filter options: "Filter" with a gear icon, a date range selector, and a grid/list view switcher. The main content area is titled "All Products" and displays three sofa models in a grid:

- Leisure Sofa Chair Set**: A pink sofa and two matching armchairs.
- Nautilus Lounge Chair**: A grey sofa with blue and white pillows.
- Rapson Thirty-Nine Sofa**: A light-colored sofa in a room with yellow walls.

Cart Component:

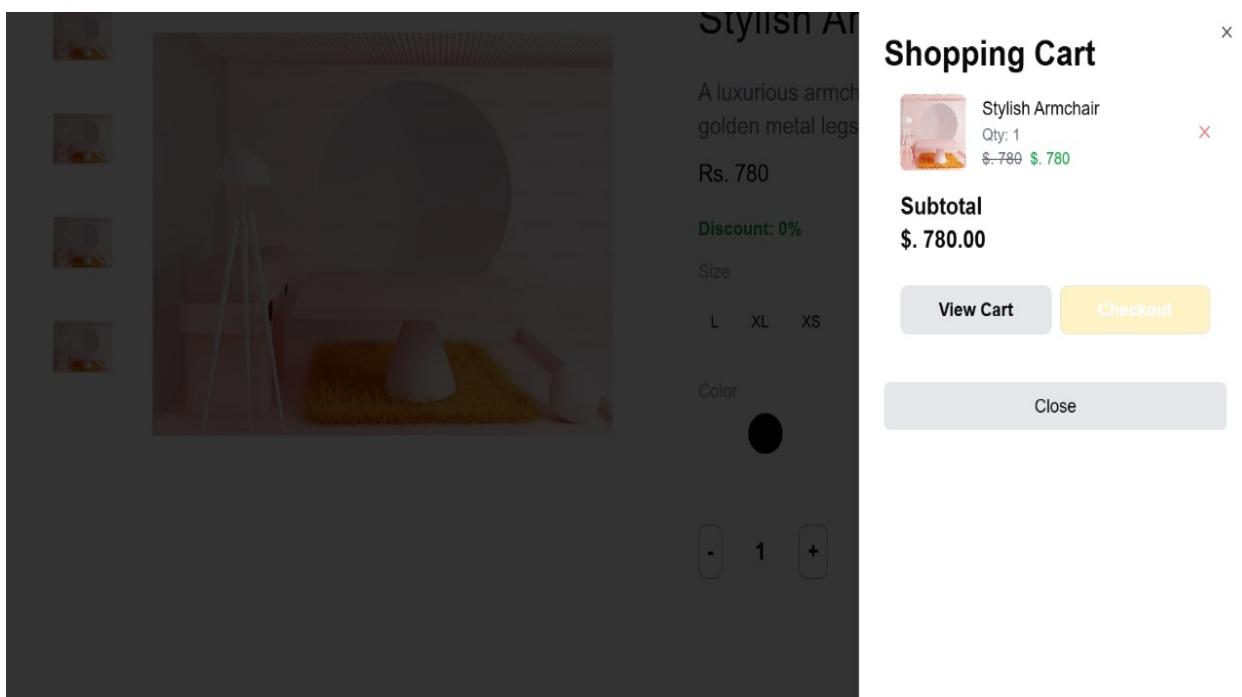

A screenshot of a code editor showing the `CartPage` component. The code is written in React and TypeScript. It starts with a header section containing a title and a link to 'Home'. Below this, it checks if the cart is empty. If empty, it displays a message. If not, it shows a table with columns for Product, Price, Quantity, and Subtotal. The code uses CSS-in-JS classes for styling.

```
const CartPage: React.FC = () => {
  return (
    <header>
      <h1>Cart</h1>
      <p><Link href="/">Home</Link> &gt; Cart</p>
    </header>

    {/* Cart Content */}
    <div>
      <h2>Cart</h2>

      {cart.length === 0 ? (
        <p>Your cart is empty.</p>
      ) : (
        <div>
          <table>
            <thead>
              <tr>
                <th>Product</th>
                <th>Price</th>
                <th>Quantity</th>
                <th>Subtotal</th>
              </tr>
            </thead>
            <tbody>
              <tr>
                <td><Image alt="Stylish Armchair" /></td>
                <td>$780</td>
                <td>1</td>
                <td>$780</td>
              </tr>
            </tbody>
          </table>
        </div>
      )}
    </div>
  )
}
```

Edit with WPS Office

The screenshot shows a mobile-style shopping cart interface. At the top, there's a blurred background image of a room with a shelf. Below it, the word "Cart" is centered in a large, bold, white font. Underneath "Cart", the text "Home > Cart" is displayed in a smaller, gray font. The main content area has a light gray background. It features a table with four columns: "Product", "Price", "Quantity", and "Subtotal". A single item, "Stylish Armchair" at \$780.00, is listed. The quantity is set to 1. To the right of the table is a yellow box containing "Cart Totals" with a subtotal and total both listed as \$780.00. At the bottom right of this box is a red "Checkout" button.

Wishlist Component:

The screenshot shows a code editor with several tabs open. The active tab is "wishlist.tsx". The code is written in React. It defines a functional component "Wishlist" that uses the "useWishlist" hook to get the wishlist items. The component contains a header with a banner and a link to "Wishlist". Below the header is a section for the wishlist table, which displays a message if the wishlist is empty or shows a table with the items. The code uses various CSS-in-JS classes like "w-full", "min-h-screen", "bg-gray-100", etc.

```
const Wishlist: React.FC = () => {
  const { wishlist } = useWishlist();

  return (
    <div className="w-full min-h-screen bg-gray-100">
      {/* Banner */}
      <header className="relative bg-cover bg-center h-70">
        <Banner />
        <div className="absolute inset-0 bg-black bg-opacity-30"></div>
        <div className="absolute inset-0 flex flex-col items-center justify-center mt-[221px] text-white t
      <div>
        <h1 className="text-5xl font-bold">Wishlist</h1>
        <p className="text-xl mt-4">
          | <Link href="/">Home</Link> &gt; Wishlist
        </p>
      </div>
    </div>
  </header>

  {/* Wishlist Table */}
  <div className="p-4 sm:p-6 bg-white rounded-lg shadow-lg mt-6 max-w-4xl mx-auto">
    <h2 className="text-xl sm:text-2xl font-bold mb-4">My Wishlist</h2>
    {wishlist.length === 0 ? (
      <p className="text-gray-500">No items in the wishlist.</p>
    ) : (
      <div className="overflow-x-auto">

Checkout flow component:

A screenshot of a code editor showing the `Checkout` component. The code is written in React using TypeScript. It contains two main sections: `Billing Details` and `Product Summary`. The `Billing Details` section uses a form to collect customer information like first name, last name, company name, country region, street address, and town city. The `Product Summary` section displays a list of items from the cart, showing the original price and the discounted price after applying a 100% discount.

```
const Checkout: React.FC = () => {
  return (
    <div className="flex flex-col lg:flex-row gap-6">
      {/* Billing Details */}
      <div className="w-full lg:w-2/3">
        <h3 className="text-xl font-semibold mb-4">Billing Details</h3>
        <form>
          {[ "firstName", "lastName", "companyName", "countryRegion", "streetAddress", "townCity", "ZipCode" ].map((field) => {
            <div key={field} className="mb-4">
              <label className="block font-medium mb-2">{field}</label>
              <input
                type={field === "Email" ? "email" : "text"}
                name={field}
                value={customerDetails[field as keyof typeof customerDetails]}
                onChange={handleInputChange}
                className="w-full border border-gray-300 rounded-md px-4 py-2"
              />
            </div>
          ))}
        </form>
      </div>

      {/* Product Summary */}
      <div className="w-full lg:w-1/3">
        <h3 className="text-xl font-semibold mb-4">Product Summary</h3>
        <div className="bg-amber-100 p-4 rounded-md">
          {cart.map((item) => {
            const discountedPrice = item.price - (item.price * item.discountPercentage) / 100;
            return (
              <div key={item._id} className="mb-4">
                <div className="flex justify-between">
                  ...
                </div>
              </div>
            )
          })
        </div>
      </div>
    </div>
  );
}
```

A screenshot of the `Checkout` page. The page has a header with the title `Checkout` and a breadcrumb navigation showing `Home > Checkout`. The left side of the page contains a `Billing Details` form with fields for first name, last name, company name, country region, street address, and town city. The right side contains a `Product Summary` section showing a single item with a discounted price. Below the summary is a `Payment Methods` section with radio buttons for `Debit Card` and `Cash on Delivery`, with `Cash on Delivery` selected. A large `Place Order` button is at the bottom right.

aezal hamza

"I recently bought the Cozy Sofa, and I must say, it's absolutely amazing! The comfort is unmatched – it's like sinking into a cloud after a long day. The fabric is soft yet durable, and the color fits perfectly with my living room decor. I love how it adds a touch of elegance and coziness to the space. Highly recommend it to anyone looking for a stylish and comfortable sofa!"

The screenshot shows a software application with a navigation bar at the top. The left sidebar contains a tree view of content items under 'Content': Product, Order, Review, Feedback Form, and question. The 'Order' item is expanded, showing sub-items: Maryam, Maryam, Untitled, Maryam, hamza, and haya. The 'Maryam' item under 'Order' is highlighted with a blue background. The main panel on the right displays a user profile for 'Maryam'. The profile includes fields for First Name (Maryam), Last Name (Siddique), and Company Name (empty). The top right of the main panel has icons for profile, help, tasks, and a flag.
